

IN THE ABSTRACT:

Please amend the abstract of the disclosure as follows:

A vehicle window regulator ~~has~~includes a fixing lug ~~(14) comprising including~~ a first part ~~(16)~~ for fixing to a window guide rail having a window-guiding direction, and a second part ~~(18)~~ for fixing to a vehicle body, ~~the~~. ~~The second part being in~~defines a plane ~~having~~, and a normal ~~(N) that~~line perpendicular to the plane that is inclined ~~in relation~~relative to the window-guiding direction. The normal ~~to the second part~~line is preferably inclined at an angle of approximately 45° ~~in relation~~relative to the window-guiding direction. ~~The advantage is that the~~The lug can be fixed in the vehicle body without the lug turning on itself during fixing by screwing, for example.
